Needs and Uses: In Report and Order and Order on Reconsideration, FCC 11-50, the Commission adopted rules that related to implementation of section 224 pole attachment access rules. Specifically, the pole attachment access rules create a series of deadlines or “timelines” by which communications providers (“attachers”) request and receive permission from electric utilities and incumbent LECs (“pole owners” or “utilities”) to attach facilities to utility poles (“access”). A denial (or partial grant) of access by a utility must include all relevant evidence and information, and explain how the evidence and information relate to lack of capacity, safety, reliability, or engineering standards. In practice, this requirement causes the utility to survey the requested poles where access is requested and to perform an engineering analysis. Other paperwork burdens are triggered during the pole-preparation stage of the timeline (“make-ready”). These include sending letters of notification to any known entities with existing attachments and the requesting attacher. Such notification letters are sent when a make-ready schedule is established. If the make-ready period is interrupted; and if the pole owner asserts its right to one 15-day extension of time, notification letters are also required. Pole owners both perform and coordinate make-

ready work. Additionally, the Order adopted a rule requiring utilities to post a list of approved contractors, and required new attachers that use contractors to perform pole attachment surveys or make-ready work in lieu of the utility using its own workers to choose from among approved contractors. If an attacher uses a utility-approved contractor, it must notify the utility, and invite the utility to send a representative to oversee the work.

Finally, the Order also broadens the existing enforcement process by permitting incumbent local exchange carriers (LECs) to file complaints alleging that the attachment rates demanded by electric utilities are unreasonable. The Order also encourages incumbent LECs that benefit from lower pole attachment costs to file data at the Commission that demonstrate that the benefits are being passed on to consumers.
